

Votre contenu électronique interactif * est créatif et innovant?

**Présentez-le pour qu'il fasse partie de
la sélection des meilleurs contenus électroniques français 2009
et participez ainsi au concours de contenu international le World Summit Award,
soutenu par l'Unesco et l'Onudi.**

Il suffit de :

Nous indiquer dans quelle(s) catégorie(s) il s'inscrit:

1. e-Gouvernement & Institutions

Delivering complete services in public administrations to individuals, businesses and organisations combined with organisational change in order to significantly improve services and democratic processes and strengthen support to public policies; fostering quality and efficiency of information exchange; empowering citizens and public services clients.

2. e-Santé & Environnement

Developing the client-centered model of health care where stakeholders collaborate, utilizing ICT, including internet technologies to manage health issues as well as the health care system; meeting the needs of citizens, patients, healthcare professionals, healthcare providers, as well as policy makers.

3. e-Learning & Education

Serving the needs of learners to acquire knowledge and skills for a complex and globalizing world; transforming schools, universities and other educational institutions through interactive, personalized and distributed learning resources; creating active e-learning communities and target models and solutions for corporate training as well as life-long learning.

4. e-Entertainment & Games

Supplying digitized entertainment products and services; entertaining the user in this world's variety of languages and its cultural diversity; supporting movement from one-way to two-way, from single to multiple players, interactive entertainment and the synergy between analog and digital platforms.

5. e-Culture & Heritage

Preserving and presenting cultural heritage in line with the challenges of the future; demonstrating valuable cultural assets clearly and informatively using state-of-the-art technology; developing the diversity of cultures and sub-cultures and the multilingual nature of societies.

6. e-Science & Technologie

Fostering global collaboration in key areas of science, and the next generation of infrastructure that will enable it; providing measures to promote and demonstrate scientific processes and make them accessible to citizens; scientific projects articulated through new media.

7. e-Business & Commerce

Support and optimization of business processes; creation of new business models in e-commerce and m-commerce, business to business, business to consumers, internet security and other areas; supporting SMEs on the marketplace; using ICTs for buying and selling as well as servicing customers and collaborating with business partners.

8. e-Inclusion & Participation

Measures supporting integration of the global information society; bringing least developed countries into the knowledge society; reducing "digital divides" between technology-empowered and technology-excluded communities and groups such as rural areas and women; bridging society and strengthening social and political participation of individuals and groups through ICTs.
